

MIU 3400

FULLY AUTOMATIC INJECTION UNIT DELIVERS IMPROVED QUALITY AND EFFICIENCY. THE MIU-3400 IS THE MOST DURABLE AND USER-FRIENDLY UNIT HAI OFFERS.

The MIU-3400 injection unit is designed and engineered to enhance the quality and efficiency of molten metal processing. With a holding capacity of 40 pounds, this fully automatic, completely portable and highly durable unit features a calibrated rotary feed table to ensure precise flux injection and a repeatable process.

BENEFITS

- Reduces flux consumption**
- Lowers inclusion and hydrogen levels**
- Reduces buildup on refractory walls**
- Reduces the metallic content in dross**
- Decreases emissions and over all cost**
- Mounted on easily maneuverable cart**

SPECIFICATIONS

- Treatment Size:** 5,000 to 40,000 lbs.
- Flux Feed Rate:** 0-4.0 lbs. / minute
- Flux Capacity:** 40 lbs.
- Gas Flow Rate:** 0.1 to 4.0 CFM
- Dimensions:** 60" high x 18" wide x 24" long
- Weight:** 100 lbs.

Wedron Flux is the aluminum casting industry's single source for molten metal cleaning and degassing. We have a full line of aluminum fluxes and can optimize flux for your alloys. In addition to the MIU-3400 flux injection unit our company offers five additional types of flux injection units to fit any application.
